

Joann's Testimony

How AuroraTek's BioEnergy Disks and Water Restructuring Technology Dramatically Improved One Cancer Survivor's Leg Lymphedema - A Case Study

My History:

A few months after radical stage 3 cancer surgery with lymph node removal, I developed a disabling incurable condition known as lymphedema. My lymphedema was in both legs and abdomen. Essentially, both legs blew up like stovepipes. The treatment involved months/years of 3 to 4 trips per week to lymphedema clinical rehab for lymphatic channel massage, compression bandages, compression pumps, and compression stockings. After all that, it's up to the patient to control the condition.

Lymphedema is fluid that collects just below the skin overflowing from the immune system because the lymph nodes were removed for cancer dissection.

Keeping this fluid in check is a daily battle. The result is chronic fatigue, lack of energy, difficulty walking, lack of sleep – even in bed, the weight of this fluid build-up makes it hard to move and roll over, not to mention the pain it causes.

My Transformation:

In February 2017, several BioEnergy Disks arrived from AuroraTek. I began my therapeutic regiment to treat my lymphedema from two perspectives:

1. Inside-out – by drinking AuroraTek's Restructured Water daily.
2. Outside-in – by using AuroraTek's BioEnergy Disks daily, placed on key points of the body.

In the beginning, my lymphedema initially over-reacted and appeared to get worse. Shortly thereafter, however, the turnaround happened with the continued use of AuroraTek's new technology.

The Benefits:

My incurable lymphedema is now in a state of sustained regression.

After 6 months:

1. My left leg is almost normal.
2. My right leg, which had suffered more lymphedema than the left leg, has improved dramatically in function and has a more normal appearance and shape. I had a large Baker's Cyst behind the right knee, which has shrunk down in size so that I can flex my right knee better.
3. My abdominal lymphedema is gone.
4. My chronic fatigue is gone.
5. Have more energy.
6. Have lost weight.
7. Sleep better.
8. Less pain = less use of pain meds = more \$ in my pocket.

Still a Work in Progress:

Lymphedema still requires daily attention, but much less attention now because of new breakthrough technology from AuroraTek.

P.S., Also works on arthritis, drink the Restructured Water and use the BioEnergy Disks wherever it hurts and pain is dissipated. Don't need to see my ortho doc any time in the near future for those painful joint injections.

Great for Pets too!

WARNING: If you have any metal device implanted in or on your body, first check with a medical professional as a precaution before using this new technology.
