Dirac Sea of Negative Energy

- **Dirac Equation** published in 1928.

Solution:

$$E = \pm mc^2$$

- **Emerging Technologies:** “Dirac’s Equation and the Sea of Negative Energy,” Part 1 by Don L. Hotson, Published in “Infinite Energy” Magazine in 2002, Issue 43.

- AuroraTek has developed a **Magnetic Dampening Field (Torsion Field) Technology** that harnesses Dirac’s Sea of Negative Energy.

Dirac's Equation and the Sea of Negative Energy

PART 1

D.L. Hotson*

Preface

Dirac's Equation has profound implications both for science and for the search for new energy. If we continue to use the wrong model (and the Standard Model is profoundly wrong) we will continue to get confusing results that are difficult to replicate.

The enclosure shows the nature of the energetic, non-stationary aether that Einstein missed, that Dirac's equation demonstrates, and that Heisenberg and others destroyed when they dismantled this equation. It further suggests that special conditions, catalysis, and energy available to a plasma may cause the synthesis, rather than the release, of free neutrons, causing transmutations and the release of energy *via beta decay*.

The treatment of modern science work more recently been Pons and Fleischmar if one had to point to fourthly and perhaps the emanculation of science caused a change thereby lost

Abstract

Dirac's wave equation Schrödinger wave equation was shorable bit of mathematically "politically correct," ed interpretation, shown the very basis in that it would have a reevaluation is the Schrodinger wave equation is a relativistic general wave equation its solutions would be all matter and energy However, the discovery resulting in this expectation, an Dirac's equation of Dirac's complete quantum spinor field, kinds of electron energy, and electro Such supposedly "gluons" have no wave. Therefore the in principle the Di

waves," the equation therefore predicts that the entire physical universe can be made from these four kinds of electron. This study validates this prediction: all matter and all forces are shown to be necessary combinations and applications of just these four kinds of electron, fulfilling Dirac's unitary expectation.

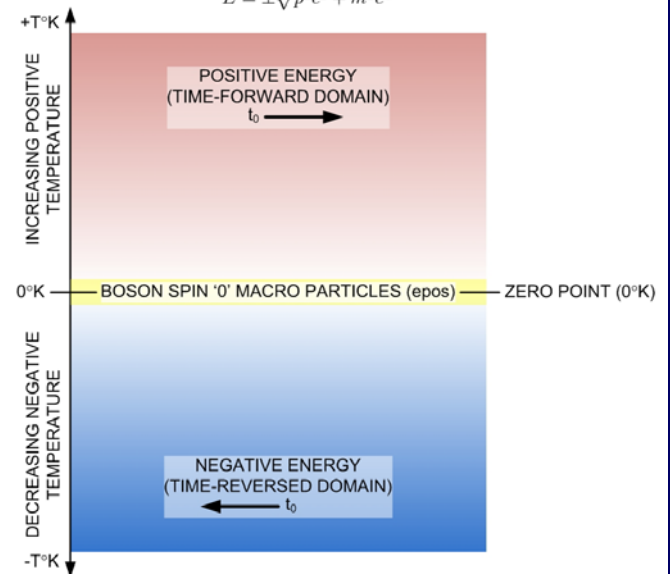

In addition, direct applications of Dirac's equation provide simple, logical, and natural models of the electromagnetic

About the Author

The Hotson "family business" is English literature. Mr. Hotson's father and uncle had Harvard Ph.D.s in the subject, and his late

DIRAC SEA OF NEGATIVE ENERGY

$$E = \pm \sqrt{p^2 c^2 + m^2 c^4}$$

AuroraTek Product Line

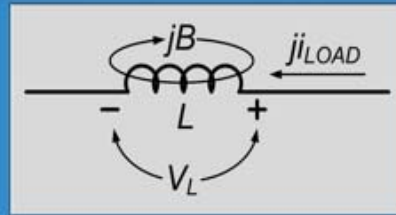

Applications are Endless!

BIOTECH

- Fast Grow Plant Technology.
- Vitality Healing Pad for People and Animals.
- Water Restructuring Technology.

ENERGY

- Self-Charging Technology!
- Greatly Improved Transformer Operating Efficiency.
- Scalable Power Systems.

SPACE

- No Inertial Effects.
- Fuel-less Propulsion Creates Positive / Negative Space-Time Curvature.
- No Upper Speed Limit.

Fast Grow Technology

Grow plants up to 50% faster

PATENT APPROVED!

AuroraTek - The Company

- **Primary Business Model** - Multi-Tier Recurring Revenue Model from sales, leasing fees and PPA streams for sale of electric power.
- **Incorporated** in the State of Nevada as a C-Corp (Nov. 2013) and is operating in the State of Arizona.
- **Raised \$500,000 in Seed Capital** since 2013.
- **Seeking Angel Investment** of \$20,000,000 for 20% of the company. Stock price valued at \$100 / Share.
- **Assets** - Three (3) patents have been filed for AuroraTek. The first was granted (US9620280B2) in April of 2017, the second was filed (62465948) in March of 2017 and the third was filed (6253831) in July of 2017.
- **Currently in pre-sales** - building a network of Sales, Marketing and Distribution personnel around the world.

\$20,000,000 Angel Investment Plans

- **OPTION 1** - \$6,000,000 Investment - Angel receives 10% of the company valued at \$10 / Share.
- Secure facility, hire engineers and technicians, finish prototype in 3 months to be delivered to Angel, and offer buyout for current investors. Expand Energy Division.
- **OPTION 2** - \$20,000,000 Investment - Angel receives 10% of the company valued at \$100 / Share.
- Option 1, start manufacturing after prototype delivery. Hire more employees and expand Biotech, Energy and Space Divisions.
- Angel may exit with 100% return on Investment within 5-years.
- **OPTION 3** - \$200,000,000 Investment - Angel receives 10% of the company valued at \$1000 / Share.
- Option 1 & 2. Expand Energy and Space Divisions.
- Angel may exit with 100% return on Investment within 5-years.
