

Dear Investor,

We have some very exciting news! We're in process of producing a unique self-sustainable technology targeted towards the eBike (electric bike) market with an initial pending order from the Far East for 3 million eBikes.

We have a corporation formed and an incredible management team assembled to take us to the next level that you will read about in the attached documents.

I'm presenting you with a ground-floor investment opportunity to come on-board with us. Included with this email are documents detailing what we're about, what we're looking for, the investment agreement document, and an investment plan.

We're looking to move quickly and decisively with a limited window of investor opportunity. We plan to manufacture components of this technology in Mexico and the Far East with final assembly in the USA.

We have gone to great lengths to protect our intellectual property (IP) and we feel it is very important that this technology be used to benefit mankind. Our registered patent attorney is Barbara Luther, <http://thelutherlawfirm.com> . Barbara is an expert in US as well International patent protection process.

Our legal counsel is Richard Keyt, <http://KeytLaw.com>. Richard is an expert with corporate tax law with over 30 years experience.

Additional support is provided by the local chapter of SCORE. Our certified mentor is Jim Batz. <http://GreaterPhoenix.score.org>

We feel honored to be able to present this great business opportunity to you allowing you to be a part of something big that will surely change the way we live. We hope you see the merit in this presentation and come on-board with us!

For more information, please don't hesitate to call 480-474-4388.

Bill & Aurora
